Tomato Pie

Main dishes | Oven

Before you start

Makes one 13x18-inch pizza, serving 4-6. Bake at 450°F for about 20 minutes (source notes “less!”), then cool at least 15 minutes.

Ingredients

Matching letters and colors = one prep bowl. Charcoal = keep separate.

Bowl A - Dough flour, salt, and yeast

Bowl B - Sauce garlic, oregano, and pepper flakes

Bowl C - Sauce tomatoes, sugar, and shallots

For the Dough

- [ ] 500 grams (17.5 ounces, about 3 1/2 cups) all-purpose flour [Bowl A]
- [ ] 10 grams (.35 ounces, about 2 teaspoons) salt [Bowl A]
- [ ] 6 grams (.175 ounces, about 1.5 teaspoon) rapid-rise yeast [Bowl A]
- [ ] 30 grams (1 ounce, about 2 1/4 tablespoons) extra-virgin olive oil, plus 1/4 c for greasing pan
- [ ] 325 grams (11.5 ounces, about 1 cup plus 6 tablespoons) water

For the Sauce

- [ ] 2 tablespoons extra-virgin olive oil
- [ ] 2 tablespoons unsalted butter
- [ ] 4 cloves garlic, grated on a microplane grater [Bowl B]
- [ ] 1 tablespoon dried oregano [Bowl B]

- [ ] 1/4 teaspoon red pepper flakes [Bowl B]
- [ ] 1 (28-ounce) can whole peeled tomatoes, roughly pureed in a food processor or blender [Bowl C]
- [ ] 1 tablespoon sugar [Bowl C]
- [ ] 2 shallot or small onion [Bowl C]
- [ ] Kosher salt
- [ ] 1/2 ounce finely grated Pecorino Romano cheese

1. Prepare and cook

1. Process 500 g flour, 10 g salt, 6 g rapid-rise yeast, 325 g water, and the source method's 0.35 oz olive oil (about 10 g) until dough rides around the blade, then process 30 seconds more. Confirm the oil discrepancy before cooking: the ingredient list instead specifies 30 g.

2. Pour remaining 1/4 cup olive oil into a 13- by 18-inch rimmed baking sheet and spread over entire inner surface with your hands. Transfer dough to baking sheet and turn in oil until thoroughly coated. Spread gently with your hands. (It will not stretch to fill the pan; this is fine.) Cover baking sheet with plastic wrap and allow to rise at room temperature until dough has slackened and started to spread out toward the edges of the pan, 2 to 3 hours. Carefully remove plastic wrap from pizza dough. Using oiled hands, and working as gently as possible to maintain air bubbles, push and stretch dough into the corners of the pan by pressing out from the center, lifting each corner, and stretching it beyond the edge of the pan. It should pull back until pan is just filled with dough. Set aside for 20 to 30 minutes while you make the sauce.

3. For sauce, heat 2 tbsp olive oil and 2 tbsp butter. Add 4 grated garlic cloves, 1 tbsp dried oregano, and 1/4 tsp red pepper flakes; cook about 1 minute. Add one 28 oz can puréed whole tomatoes, 1 tbsp sugar, and 2 whole shallots or small onions (as listed). Simmer about 45 minutes until thick. Salt to taste and cool in the fridge.

4. Two hours before baking, remove dough from fridge. Generously grease the inside of a 13- by 18-inch rimmed baking sheet with olive oil (about 3 tablespoons). Turn dough out onto lightly floured surface. Form into flat ball and transfer to baking sheet. Using your hands, coat the ball on all sides with olive oil. Loosely cover the baking sheet with plastic and let dough rise in a warm spot for 1 hour. The dough should spread out . (Try rolling out with rolling pin instead)

5. Carefully stretch and push the dough into the corners and edges of the pan. Cover loosely, and let rise for 1 hour longer. Meanwhile, adjust

oven rack to upper middle position and preheat oven to 450°F. When dough has risen, gently dock center with finger tips and use your hands to create a risen ridge about 1-inch wide around the edge.

6. Spread all the prepared sauce over the dough, leaving a 1-inch border. Bake about 20 minutes at 450°F (the saved note suggests less), rotating halfway, until edges are golden and crisp. Cool at least 15 minutes. Sprinkle with 1/2 oz grated Pecorino Romano, cut, and serve.

Notes

Source discrepancy: dough ingredient list says 30 g olive oil, but its first direction says 0.35 oz (about 10 g). It also moves dough from a fridge without specifying an earlier refrigeration step. These details need clarification; no overnight schedule has been invented.
