No-Knead Neapolitan Pizza Dough

Breads | Oven

Before you start

Rise 8-12 hours at room temperature, then cold ferment 2-4 days (3 days preferred). Rest 2-3 hours at room temperature before stretching.

Ingredients

Matching letters and colors = one prep bowl. Charcoal = keep separate.

Bowl A - Flour, salt, and yeast

- [ ] 1000g bread flour, preferably Italian-style "OO" [Bowl A]
- [ ] 25g fine sea salt [Bowl A]
- [ ] 10g instant yeast [Bowl A]
- [ ] 650 ml water (650 grams)

1. Prepare and cook

1. Combine flour, salt, and yeast in a large bowl (mine is 4.5 L) and whisk until homogenous. Add water and incorporate into flour using a fork, your hands, or a dough wisk until no dry flour remains on the bottom of the bowl. (This is a “no-knead” recipe. We aren't spending 20 minutes kneading the dough. We just want everything to be pretty homogenous.

2. Cover the bowl tightly with a lid plastic wrap and allow to rise at room temperature for 8 to 12 hours.

3. Turn dough out onto a lightly floured surface and give it several folds. Divide into 6-8 even balls. Place each in a covered container. Place in the refrigerator and allow to cold ferment for 2-4 days. (3 days is supposed to be optimal.)

4. Remove from the refrigerator. Take one of the hunks of dough and give it a few folds. Then stretch it over itself and pinch it closed. Roll it around to close the seam and make a nice ball. Repeat with the others.

5. Dust some flour on top and cover with a towel to rest at room temperature for 2-3 hours before stretching and baking.

6. Freeze the balls if you want to use them later instead of the cold ferment (Step 3). If freezing, put the balls separated on a tray and put them in the freezer for an hour or so. Once frozen you can put them in individual zip lock bags and toss them back in the freezer. When you want to use some, take some out of the freezer and put the refrigerator the night before and proceed to step 4 when ready to use.

Notes

Source formula uses 25 g salt per 1000 g flour, but the accompanying ratio note says 2%; 25 g is preserved and the discrepancy is flagged.

Yield notes list 8 x 210 g or 7 x 240 g dough balls; directions say divide into 6-8 balls. Baking temperature and topping instructions are not

included.
