Detroit-Style Pizza

Main dishes | Oven

Before you start

Dough has a 1-2-day cold ferment. Saved pan-first method and original bowl-first method are distinguished below.

Ingredients

Matching letters and colors = one prep bowl. Charcoal = keep separate.

Bowl A - Flour and salt

Bowl B - Warm water and yeast

- [ ] 1050 g bread flour [Bowl A]
- [ ] 765 g water, warmed to 85-95°F [Bowl B]
- [ ] 30 g kosher salt [Bowl A]
- [ ] 10.5 g instant dried yeast [Bowl B]

- [ ] Butter or shortening, to grease pans
- [ ] 16 oz cheese per 10x14-inch pizza (brick cheese, or white cheddar, Jack, or Havarti; mozzarella optional)
- [ ] Pizza sauce, as desired
- [ ] Fresh basil, chopped
- [ ] Pepperoni (optional)

1. Prepare and cook

1. Mix flour and salt in a stand mixer with dough hook. Add yeast to warm water and wait 5 minutes. Slowly add to flour on low speed; mix about 10 minutes until smooth, wet, and sticky. Scrape bowl as needed.

2. Personal pan method: rest dough and divide into 3 balls at step 3, spreading into pans before the cold ferment. The captured recipe instead folds dough, rests covered 1-2 hours, and refrigerates 1-2 days; these are alternative sequences, not additional rises.

3. Bring dough to room temperature for 3 hours. Heat home oven to 550°F (or outdoor pizza oven to 700-800°F). Grease pans and stretch dough to fit, rest 30 minutes, then stretch to edges. Par-bake on oven bottom 5 minutes.

4. Top with mozzarella if using, then cubed brick cheese to the edges, sauce stripes, and optional toppings. Home oven: bottom rack about 7 minutes, broiling briefly if needed. Outdoor pizza

oven: 5-6 minutes, rotating halfway and shielding with foil if browning too quickly.

5. Release edges with a thin metal spatula, transfer to rack, rest 3 minutes, and slice.

Notes

Recovered from the two recipe screenshots embedded in the saved Doc. Saved personal yield: three 10x14-inch pizzas.

A question about par-baking with Jack and freezing is an experiment, not an adopted instruction. Kenji's separate sauce formula remains in the Doc.
